

"Four" Your Information

About Addison's 4th Grade

Week of October 7-11, 2019

Reading & Language Arts

In ELA we will continue to work on punctuating dialogue. The next focus will be using prepositional phrases in writing. As we finish identifying character traits unit, we will move to identifying types of text structure.

Vocabulary Workshop Unit 3 will begin. Start studying those definitions on Monday.

This is the last week of grades for the first quarter.

AC Reading & Language Arts

We will be submitting final narratives and body biographies this week.

Vocabulary Workshop Unit 3

Review and Test dialog and punctuation

AC Math

We will be working all week on Order of Operations with a culminating quiz towards the end of the week.

Math

This week we will be revising addition and subtraction concepts, and then students will take the unit test towards the end of the week. We will begin with multiplication after that, and so this is a good time for students to practice their multiplication math facts.

Reminders!

This Thursday (10/10) is an early release day as well as all next week during conference week. Students will be release 2 hours early. ASP will be available.

All classes will be visiting the science lab this week. Due to early release, the days and times could be different from the normal schedule.

Science/Social Studies

We will continue learning about stars and planets this week and will have our final test later in the week. Students should study their science journals for a bit each evening. They can also use their science textbook and vocabulary resources. Here is a link Mrs. Sattelmeier created to help study some of the vocabulary words.
